About ERPNext

Involve is having expertise in ERPNext Implementation and Customization.

What is ERPNext?

ERPNext is a **fully open-source enterprise resource planning (ERP) software** designed for small, medium, and large businesses. It helps organizations manage various business processes efficiently.

Key Modules:

- ✓ Accounting & Finance Inventory &
- ✓ Stock Management CRM & Sales
- ✓ HR & Payroll
- ✓ Manufacturing & Production
- ✓ Project Management

How we do Implementation In ERPNext ?

ERPNext implementation involves **requirement analysis, installation, data migration, customization, training, testing, and go-live.**

Continuous support ensures smooth operations and scalability.

How we do customization In ERPNext ?

Customization in ERPNext is done via **UI-based form modifications, custom scripts, and automation.**

Advanced changes use **Frappe framework for custom apps and integrations.**

Are you facing below challenges in your company?

Why Implementations Fail ?

Wrong Software

Selecting Wrong ERP, HRM due to not having enough knowledge about features

Wrong Team

Not having Skilled Team & Resources in-house or with On-boarded Vendor

Wrong Time

Not evaluating what is the right time & approach to start ERP implementation

Wrong NDP

Customising with wrong Needs, Desires, Problems of your Company

Wrong Vendor

Shortlisting, Negotiations & Onboarding wrong Vendor on Unrealistic Cost or Terms

Wrong Deadlines

Unable to implement ERP within expected time, resources or budget

No Data Control

Sharing Confidential Data & System Control with vendors for any Changes

100% Dependency

On Outside Agency, Freelancers for any Changes or Maintenance
